

Software Operators console Lifting mechanism Accessories

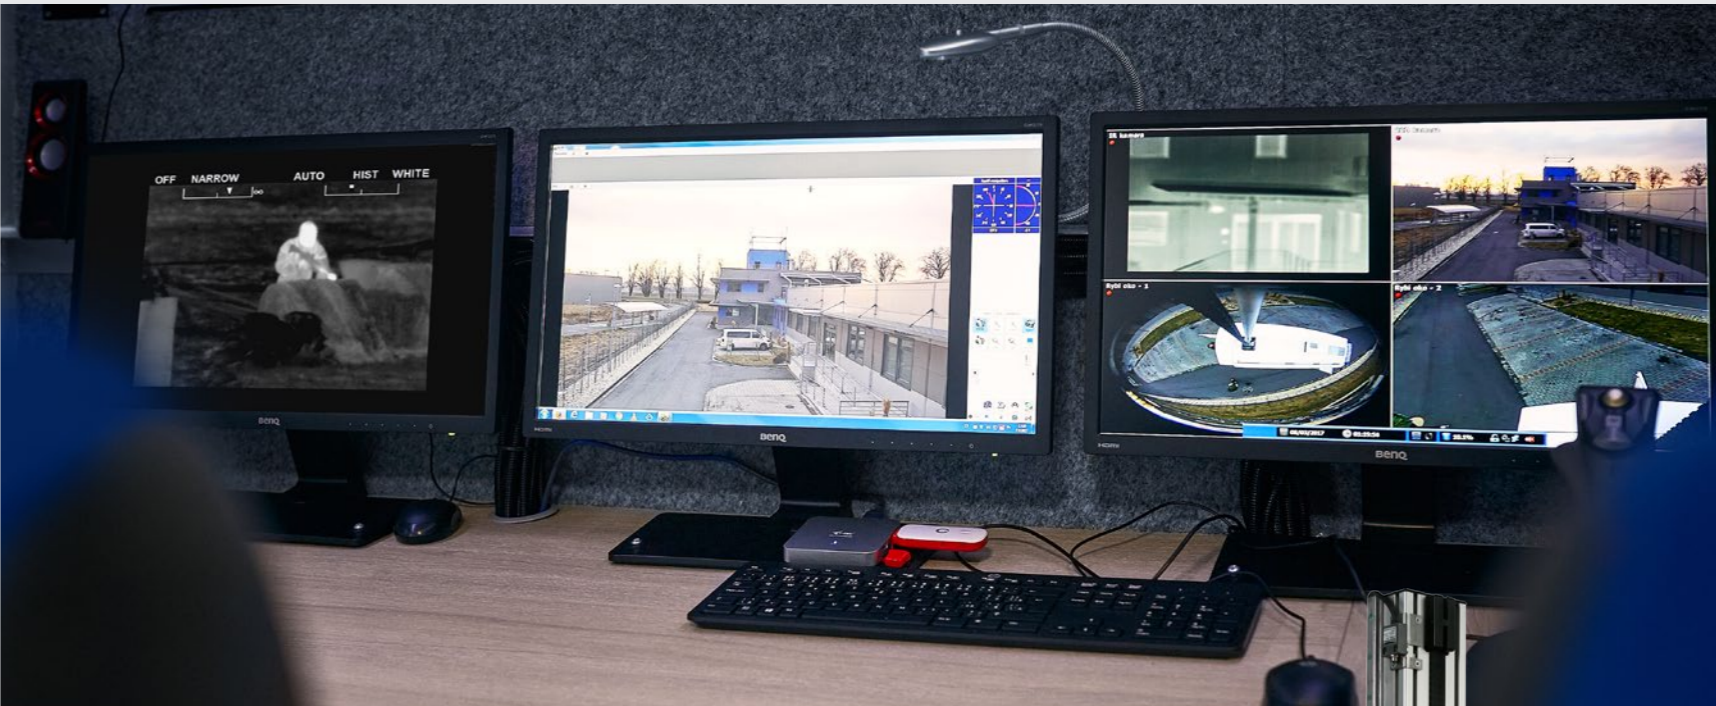

Control SW RCM

Control software can be delivered together with all afore-mentioned systems. It rapidly increases an efficiency of the system because it includes many features that comes in handy to an operator such as object tracking, motion detection alarm, digital image stabilization, vector maps, seismic sensors integration etc.

Network solution SW CNS.NET

- complete network solution for multiple surveillance systems (electro-optic systems, radars, seismic sensors etc)
- video transmission in real time
- storing of data on HDD (video, image , audio, coordinates of targets etc.)
- based on a TCP/IP client-server architecture and open textual communication protocol
- possibility to control from Android devices
- multiple levels of access rights

Operators console CU-5

Operator console CU-5 is a standalone unit designed to control all EVPÚ Defence Surveillance and Monitoring systems. CU-5 is a Windows based operators console and together with installed EVPÚ Defence SW offer to customer comfortable and operator friendly work for long time and increase effectiveness of operator work.

CU-5	
Display	15" TFT
HMI interface	Keyboard, trackball, joystick
Electrical and Electronic Interface	
Communication interface	Ethernet, USB
Video input	analog
Power supply	24 V DC (22 V – 32 V)
Consumption	45 W (max)
Environmental Conditions	
Operating temp.	-20 °C to +50 °C
Storage Temp.	-40 °C to +60 °C
Envir. Protection	IP65 open / IP66 close
Dimension (WxDxH)	470 x 350 x 170 mm
Weight	11,5 kg

Accessories

- **lifting mechanism** – installation into different types of vehicles, electric drive, lifting of payload to required height
- **rugged sensors** like GPS module, digital magnetic compass DMC, laser range finder LRF
- **system and sensor cables**
- **seismic sensors** UGS
- **PIR and electromagnetic sensors** for perimeter protection

• lifting mechanism
